Hrúbka hrany 50 mm.

# Topalit table top | Topalit

RESISTANT TO: | ODPORNÝ NA: | ODOLNÝ PROTI:

By attaching tables with the Topalit tops together to form rows, we will not achieve a perfectly flat surface.

Pripojením stola topalitovými doskami do radu, nedosiahneme perfektný rovný povrch

The tables cannot be stored by putting one on the top of another when their tops are directed towards each other. This arrangement prevents rainwater from flowing down freely.

Stoly nemôžu byť skladované doskami jeden na druhom, pokiaľ sú navzájom spojené. Toto bráni pred voľne tečúcou dažďovou vodou.
